## DETAILED ACTION

### *Claim Objections*

1. Claims 4, 5, 10, 17, 18 are objected to because of the following informalities:

A. In claims 4, 5, 10, 17 and 18, the use of the terms "high" and "low" render the claim ambiguous. The terms are neither defined in the specification nor do they have a well-defined meaning in the art. The necessary degree of high Tg and/or low Tg have not been defined.

B. In claims 5 and 18, the use of the term "ultra high" renders the claim ambiguous. The term is neither defined in the specification nor does it have a well-defined meaning in the art. The necessary degree of ultra high molecular value has not been defined.

Appropriate correction is required.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-4, 6-17, 19 and 20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 in view of paragraphs [0039, 0063, 0079 and Example 1] of copending Application No. 10/890,701. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application overlap with the claims of 10/890,701, and they would be obvious.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
